

ERRATUM

O'Connor, A. 2000. Brixham Cave & the antiquity of man: reassessing the archaeological & historical significance of a British cave site. *Lithics* **21**: 20-29.

In Anne O'Connor's paper on Brixham Cave which appeared in *Lithics* 21 the first column was omitted from Table 3 on p. 24. This had the effect of rendering the whole table rather meaningless. The

LSS would like to apologise for this error and any inconvenience it may have caused. We reproduce the table, including the first column, below.

Table 3: Summary data for faunal preservation type, gnawmarks and age

SPECIES	CONDITION				GNAWMARKS			STAINING				ROOTMARKS		AGE				NISP	MNI
	fresh	slightly worn	worn	very worn	absent	gnawed	heavily gnawed	absent	lightly stained	stained	heavily stained	absent	present	young	prime	old	indet.
